

Fumpa OG Quickstart

Quick-Start Guide

FUMPA

Press the play button ► to turn Fumpa on

The right-hand side of the screen will show current battery charge and pressure scale

Press the plus + button and the - button together to choose a preferred pressure measurement scale: psi, kPa or E

Use the plus button + or the - to preset your desired inflation pressure

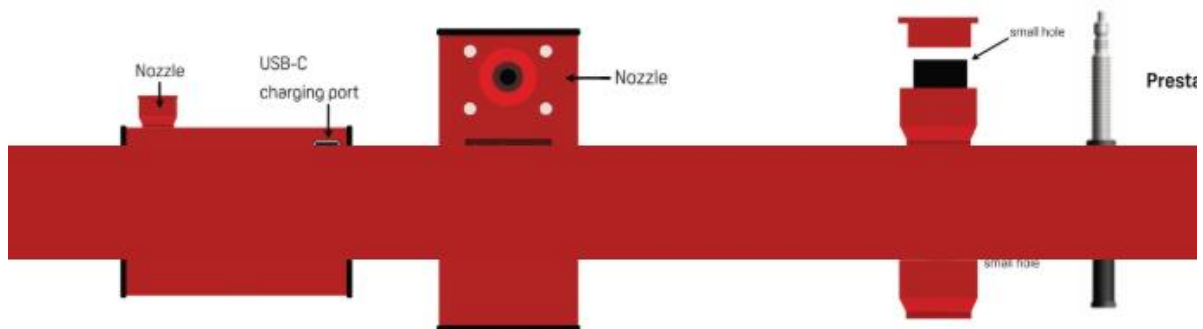

Press the ► button once to initiate the pump's motor and inflate to the preset pressure

Press and hold the ► button to manually inflate, releasing the ► button will stop the pump

Fumpa will automatically turn itself off after two minutes of inactivity

To recharge Fumpa, connect the pump to a USB power source with the supplied USB-C cord

Whenever Fumpa is connected to a power source, the button light will glow red, it does not change when fully charge

For detailed instructions, see the Manuals section of the Fumpa website: fumpa.cc/manuals

WARNING!

Don't leave your Fumpa plugged-in and charging, unattended.

Counterfeit or poor-quality wall chargers pose a genuine **fire risk** and can damage Fumpa. Only charge Fumpa using a USB wall charger from a reputable consumer electronics supplier and make sure it is marked with at least one of the following certification symbols:

Fumpa is not a toy!

Fumpas are not weather- or water-proof. They need to draw air into the pump in order to compress and expel it through their nozzle. Fumpas contain electric motors, lithium batteries and complex electronic components. **Please keep Fumpas dry.**

Fumpas are professional-grade tools, they are not toys. They're solid and capable little pieces of machinery. When running and not connected to a tyre, ball, etc. ... a Fumpa can be loud.

Please be mindful of noise when activating Fumpas around unsuspecting people.
